

For A Sustainable Clean Earth

company profile-2035

We focus on delivering smart
solutions that help keep public
and private spaces

About company

ECOBOT is a company specialized in smart environmental cleaning solutions.

We develop advanced water-cleaning robots and ground-cleaning robots powered by electricity and long-lasting batteries.

Our mission is to help cities, resorts, parks, and public spaces stay clean and safe by reducing pollution and increasing cleaning efficiency through intelligent automation.

We focus on delivering high-quality, reliable, and eco-friendly technology that makes maintenance easier and more sustainable.

Mission & Vission

Mission

To create innovative, environmentally friendly cleaning solutions that improve the quality of life and contribute to a healthier planet.

Vision

We are committed to developing technologies that support sustainability and reduce environmental impact.

We strive to reduce pollution and enhance quality of life by providing robots capable of operating efficiently in various environmental conditions. Our vision is to leverage technology to support smart city initiatives and create cleaner urban infrastructure.

We aim to build cleaner and more sustainable cities through intelligent robots that deliver advanced environmental solutions. And we work on providing robots that help protect the environment.

Our services

Street Sweeping

These robots efficiently clean streets from dust and daily dirt using advanced brushes and suction systems.

Water Suction and Drying

These robots absorb excess water and remove moisture from surfaces to prevent slipping hazards.

Water Purification

These robots purify the water used during cleaning to reduce waste and enhance sustainability.

Litter and Leaf Collection

These robots use smart sensors to identify and collect trash and fallen leaves with high efficiency.
